become certified!

## REQB

The Requirements Engineering Qualifications Board (REQB) has been founded in 2006 by a group of international experts. These experts came from Belgium, Czech Republic, France, Germany, India, the Netherlands, Norway, Poland, Russia, United Kingdom and United States.

The main aim of the board is to build up an international scheme for Requirements Engineering. By doing this the board wants to create an international standard that can be seen as a common language on the field of Requirements Engineering and that creates international comparability.

## RE as success factor

Requirements Engineering is an important factor for the success of your project. Bad Requirements Engineering has effects on the whole project and can lead to unexpected costs or even to the failure of the project. The REQB certification scheme helps to enlarge the competence in this field. Participants get through the certification an overview over the topic. Further the exam preparation courses of the accredited training providers help to learn the basically techniques and methods of Requirements Engineering.

## REQB grows with your career

The REQB certification grows with your career. The Foundation Level, which imparts the methods and techniques for Requirements Engineering is the starting part. The next level is the Advanced Level, which builds upon the Foundation Level and outlines topics of the Foundation Level more intensively. Important methods and techniques will be deepened in this part. For the future also an Expert Level is under development.

The REQB certification offers you many possibilities that no other certification for Requirements Engineering can offer:

## REQB is a global certification scheme

REQB has been developed by international experts. Experts from Europe, Asia and the Americas ensure that the scheme meets global demands.

## REQB brings international comparability

All around the world many people are working in the field of Requirements Engineering. Through the REQB scheme it is now possible to compare the knowledge and the competence of experts on a global level.

## REQB is practical

In contrary to other personal certification programs the main aspect of the REQB certification program is the practical use of the knowledge and methods taught in the courses and tested in the exam.
